FOREWORD

Graduation, 1961. A time for rejoicing by those of us who, as graduating seniors, are ending our days in high school. But also a time for remembrance, for looking back on our days in high school, as they steadily slip further into the past, irretrievable, save in our own minds.

Our theme is "In Retrospect." Not only at this Graduation, but in later years; the looking back, from times and ages yet in the future, on the events and personalities which at Tech moulded the character we possess. Blueprint of our past, Blueprint for our future, bound inseperably together for us, as we now look in retrospect on our days at Tech.

Willam Pabst, Principal

WILLIAM PABST, PRINCIPAL

June 1, 1961

To the Seniors,

Retrospection tends to be directly proportional to the age of the viewer. It is natural that both you and I should, as another June approaches, look back into the past.

You remember your distant freshman days, the search for the swimming pool on the eighth floor and graduation looming far in the future. Time passed and you became sophomores, juniors and suddenly you are seniors. Where did the time go! It was work but also fun -and at the same time a boy had become a man.

As I look back, my mind returns to 1922 and Tech's first days at the old building. I see again our rising scholastic, industrial and athletic reputation. I remember helping to design our present building. In rapid sequence came the Great Depression, Pearl Harbor and Tech at war. Over 6,000 Technites entered the services - more than 100 never returned.

I recall the peace that was no peace, the birth of the atomic and space ages.

Against this background of the past, I see the more than 30,000 Technites, the distinguished group of graduates who have passed through Tech. You are soon to join this group.

Let the world know that you are as proud of Tech as Tech is proud of you. I place her reputation in your hands. You will not fail us.

I have enjoyed working with you these past four years. You are the future. May you have the good fortune you deserve.

Cordially yours,

William Pabst

CLASS HISTORY

Fall, 1957. A new freshman class enters Brooklyn Tech, half timid, half aggressive, to begin high school. Fall, 1957. A world takes its first faltering steps towards the skies as, on October 4, the U.S.S.R. put its first Sputnik satelite into orbit. Both events marked the beginning of an era, for a few Technites or for the world. From that time on, the high school years of the Tech class of June 1961, have been full of violent change.

The end of the first "freshie" term came as the U.S. satelite, the Explorer I, was successfully orbited. As second termers we witnessed two political changes which could affect our lives for years. In March, Nikita S. Kruschev assumed power in Russia, and on June 1, Gen. Charles De Gaulle returned to power in France as Premier.

When we returned as sophomores, now privileged to sneer at the lowly freshie, we also returned to the news of the death of Pope Pius XII, after nineteen years of reign, and the election of Angelo Guiseppi Cardinal Roncalli as Pope John XXIII. Another character of a different kind came to power as, with the fall of the dictatorship of Fulgencio Batista in Cuba, Fidel Castro took control on the first day of the new year, 1959. The long dreamed of St. Lawrence Seaway was dedicated in June, as we left with half of high school completed.

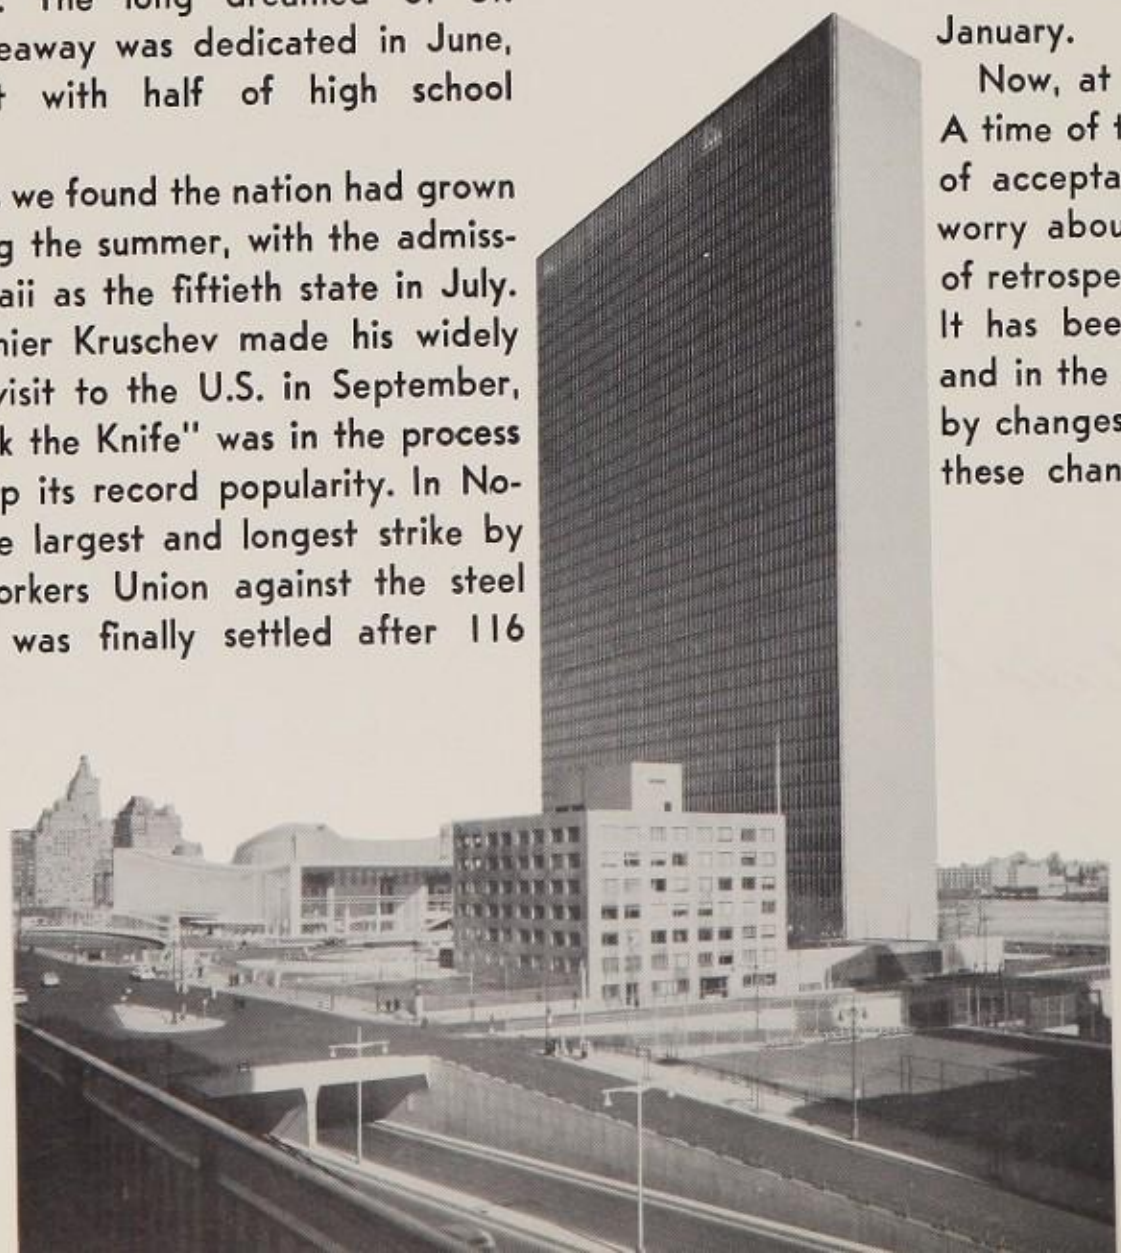
As juniors we found the nation had grown again during the summer, with the admission of Hawaii as the fiftieth state in July. Soviet Premier Kruschev made his widely publicised visit to the U.S. in September, when "Mack the Knife" was in the process of rolling up its record popularity. In November, the largest and longest strike by the Steelworkers Union against the steel companies was finally settled after 116 days.

In our sixth term, as Technites began to turn a wary eye toward college admissions, scholarships and the terror of the College Boards, the world hung in near terror on the news, as, in rapid succession, an American U-2 reconaissance plane was shot down deep inside Russia, and as the summit conference in Paris later that month broke up amid mutual animosity.

During the summer, another conflict arose in Africa as the granting of independence to the former Belgian Congo provoked disorders, anarchy, near civil war, and finally United Nations intervention to attempt to preserve order. Another perennial bone of contention was thus created for the major powers.

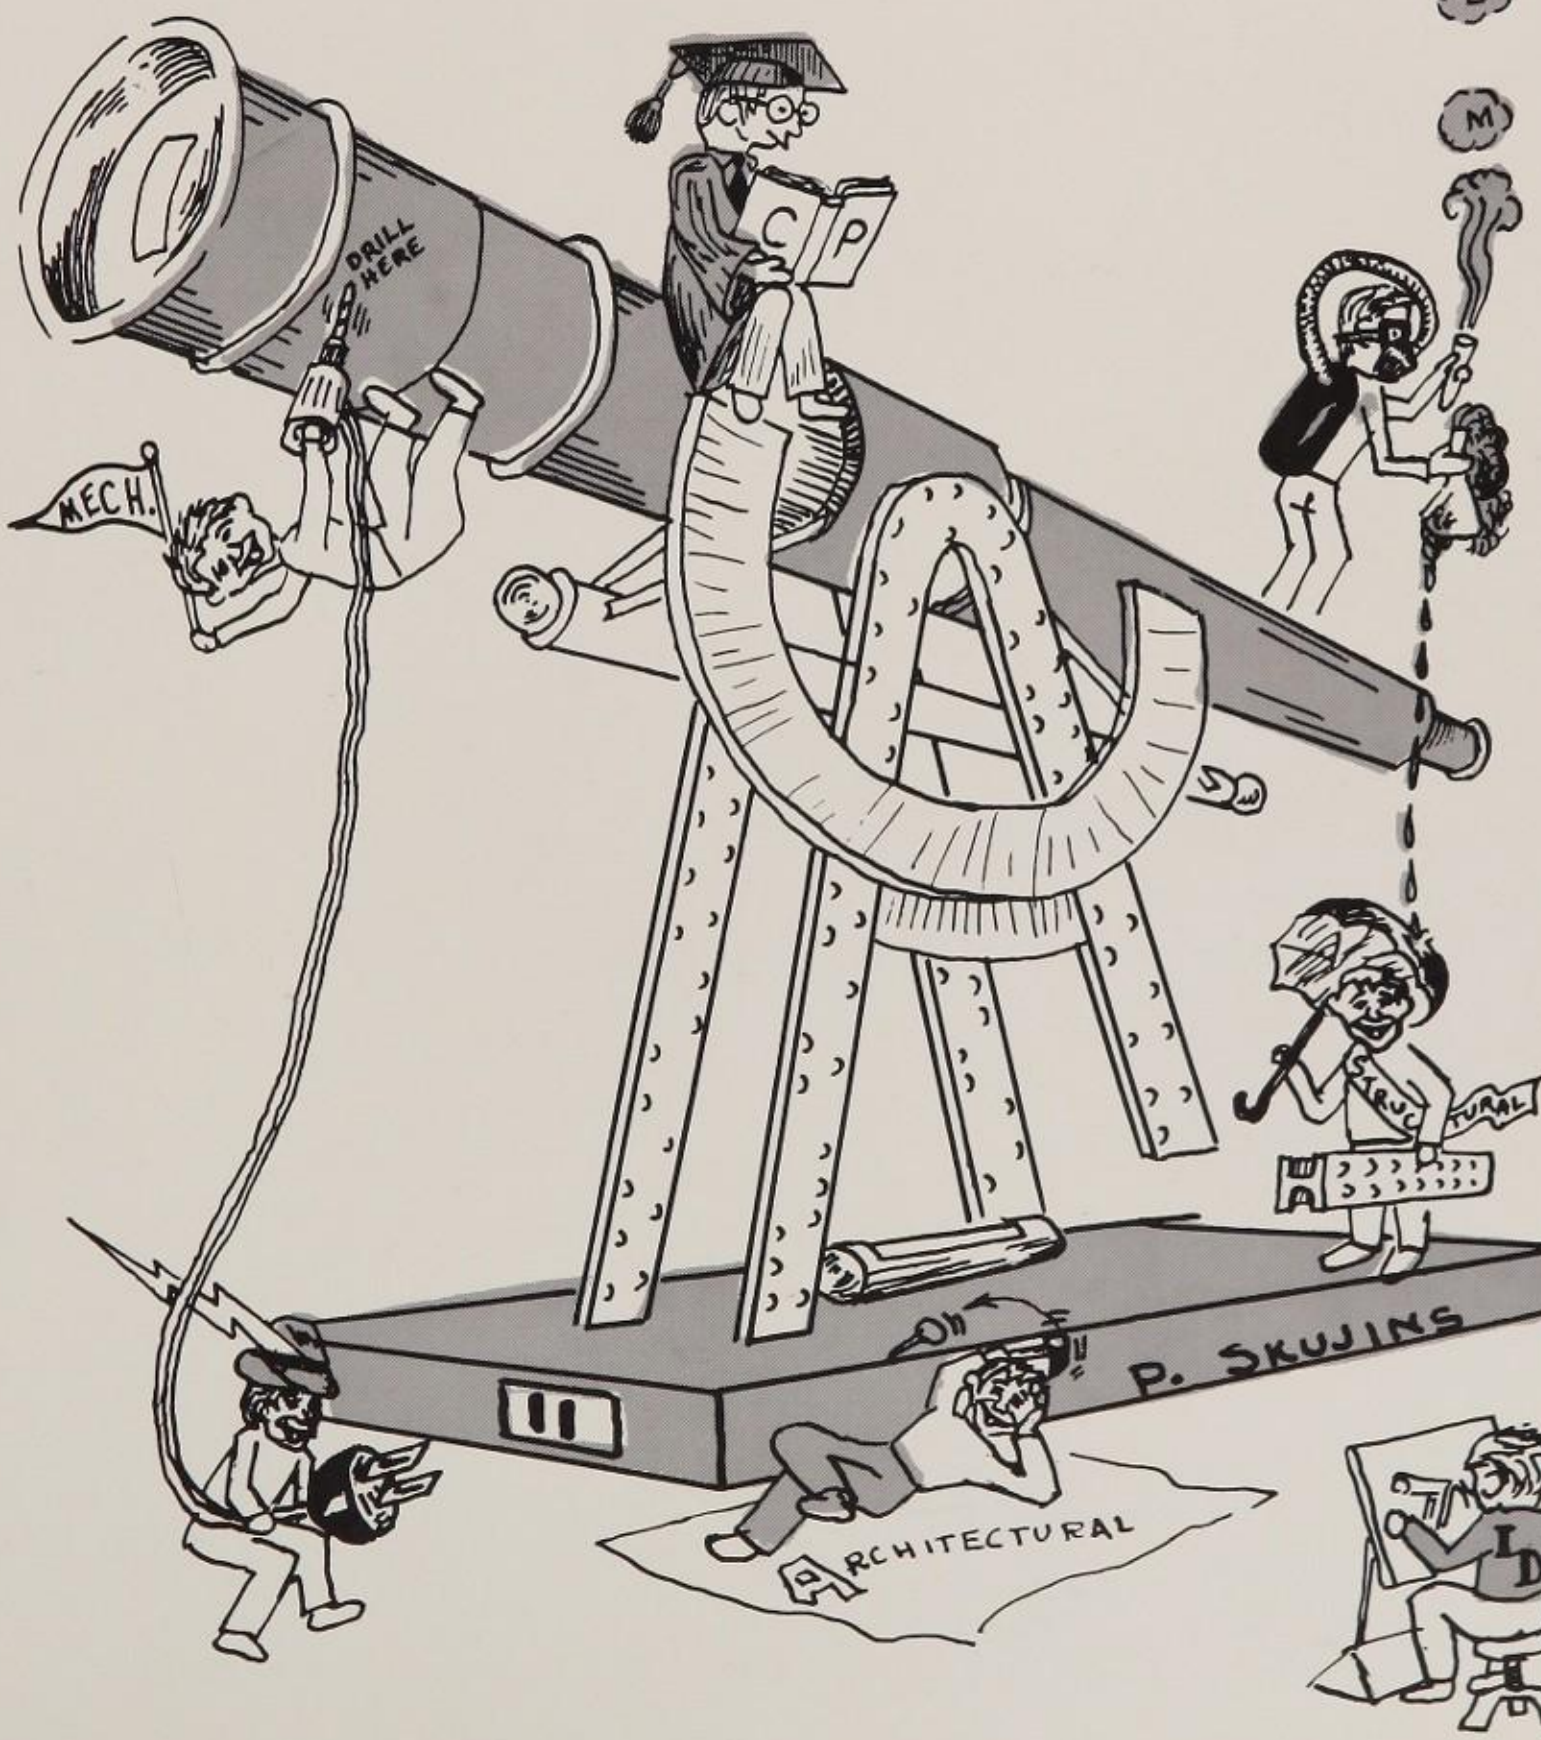
As our senior year dawned in September, 1960, we watched and debated the hard fought Presidential campaign between Vice-President Nixon and Senator John F. Kennedy. Pittsburg won the World Series, 4 games to 3, despite Bobby Richardson's record breaking feat of six runs batted in the third game, leading the Yankees to a 10-0 shutout. The Presidential election, fought bitterly right down to the wire, culminated in the victory of John Kennedy, who was inaugurated as our 35th President at the close of our 7th term in January.

Now, at last, our eighth term has come. A time of that sitting and waiting for news of acceptance or rejection to college; of worry about passing and graduation; and of retrospection. Our time at Tech is done. It has been marked both here in school and in the rest of the world we will inhabit by changes. Let us hope that the results of these changes will be ultimately good.



Courses

Put a little fun in your life
Try singing.
Richard Jewett



AERONAUTICAL

As rockets, missiles and satellites have come to play an ever increasing role in our daily lives, we can easily see that there is an obvious need for the well trained creative aeronautical engineer and technician. Upon realizing this, our thoughts immediately refer back to Tech's modern Aeronautical Course with all its industrious students. As we peer inside we have nothing but respect for our fellow classmates who are so busily at work designing and building these highly complicated machines.

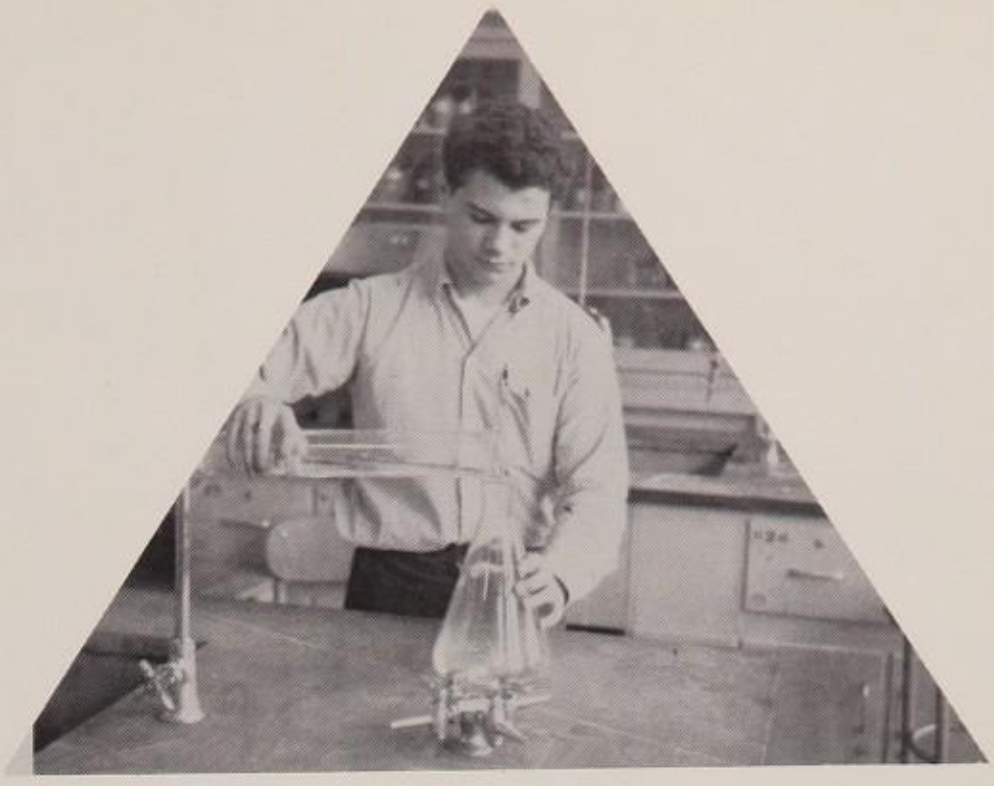
The Aero Course, as it is so foundly referred to, aims to provide those aspirants of aeronautical engineering, aero design, or those who want to build the planes of the future with the sound fundamentals of most phases of aeronautics. It also familarizes the student with other technical and non-technical aspects of this most modern and advanced field.

ARCHITECTURAL

As most of us struggle hopelessly with our technical drawing, we can't help but think of those of us who find this stuff childsplay. These "geniuses" are the boys in the Architectural Course.

Our architects concentrate mainly on developing drafting techniques, designing, planning and all the other courses that require so much skill to master. We all know their efforts have not been in vain. For are there any of us who have not stopped to admire their beautiful renditions as well as their highly complicated housing plans? Aside from the aesthetic part, there is much practical work done by Tech's architects. This consists of studying foundations, steel and concrete slab construction, mechanical trades such as plumbing, heating and ventilation to actually planning a house and developing it into presentation form. The Architertural Course gives the graduates enough knowledge and skill for entrance into industry, or aid them in their pursuit of their studies in college.

Dean of Engineering
Paul L. Redd



CHEMICAL

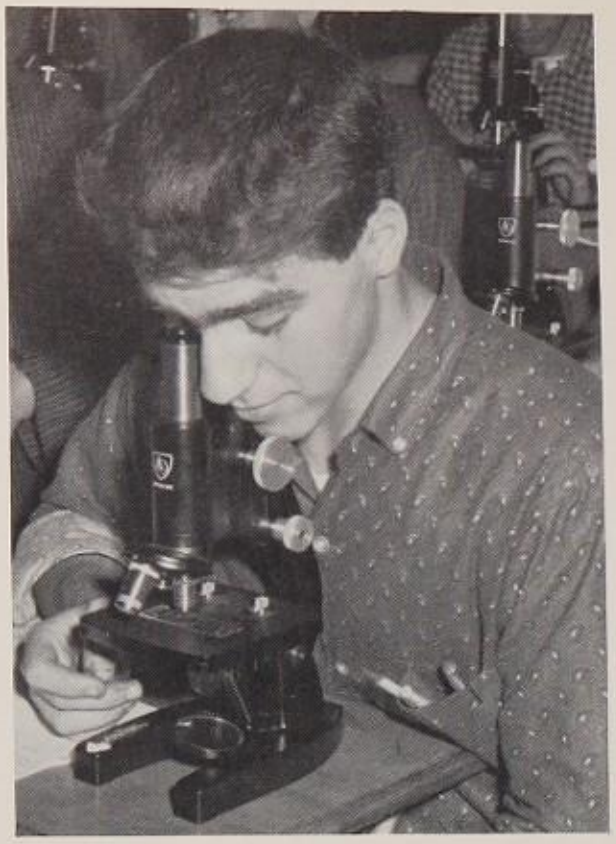
Looking back into the pages of history, we find that man has always needed chemistry in some form, shape or manner. In a time when chemistry plays such an important role in our lives it is essential that the United States have qualified chemists and chemical engineers.

It has been said that the strength of our country depends on higher education, and the chemical course in Tech provides this country with men who are able, qualified, and willing to enter college or industry.

To enter any field of chemistry, one must have a good foundation in the subject. Advanced inorganic chemistry and qualitive analysis, both given in the Chemical Course, provide this foundation.

In qualitive analysis, the student learns how to analyze a compound and to find its basic components. In advandved inorganic chemistry, the student deals mainly with carbon, its allotropic forms, its main compounds, and methods of synthesis.

Look back through the pages of time again . . . where would we be without chemistry?



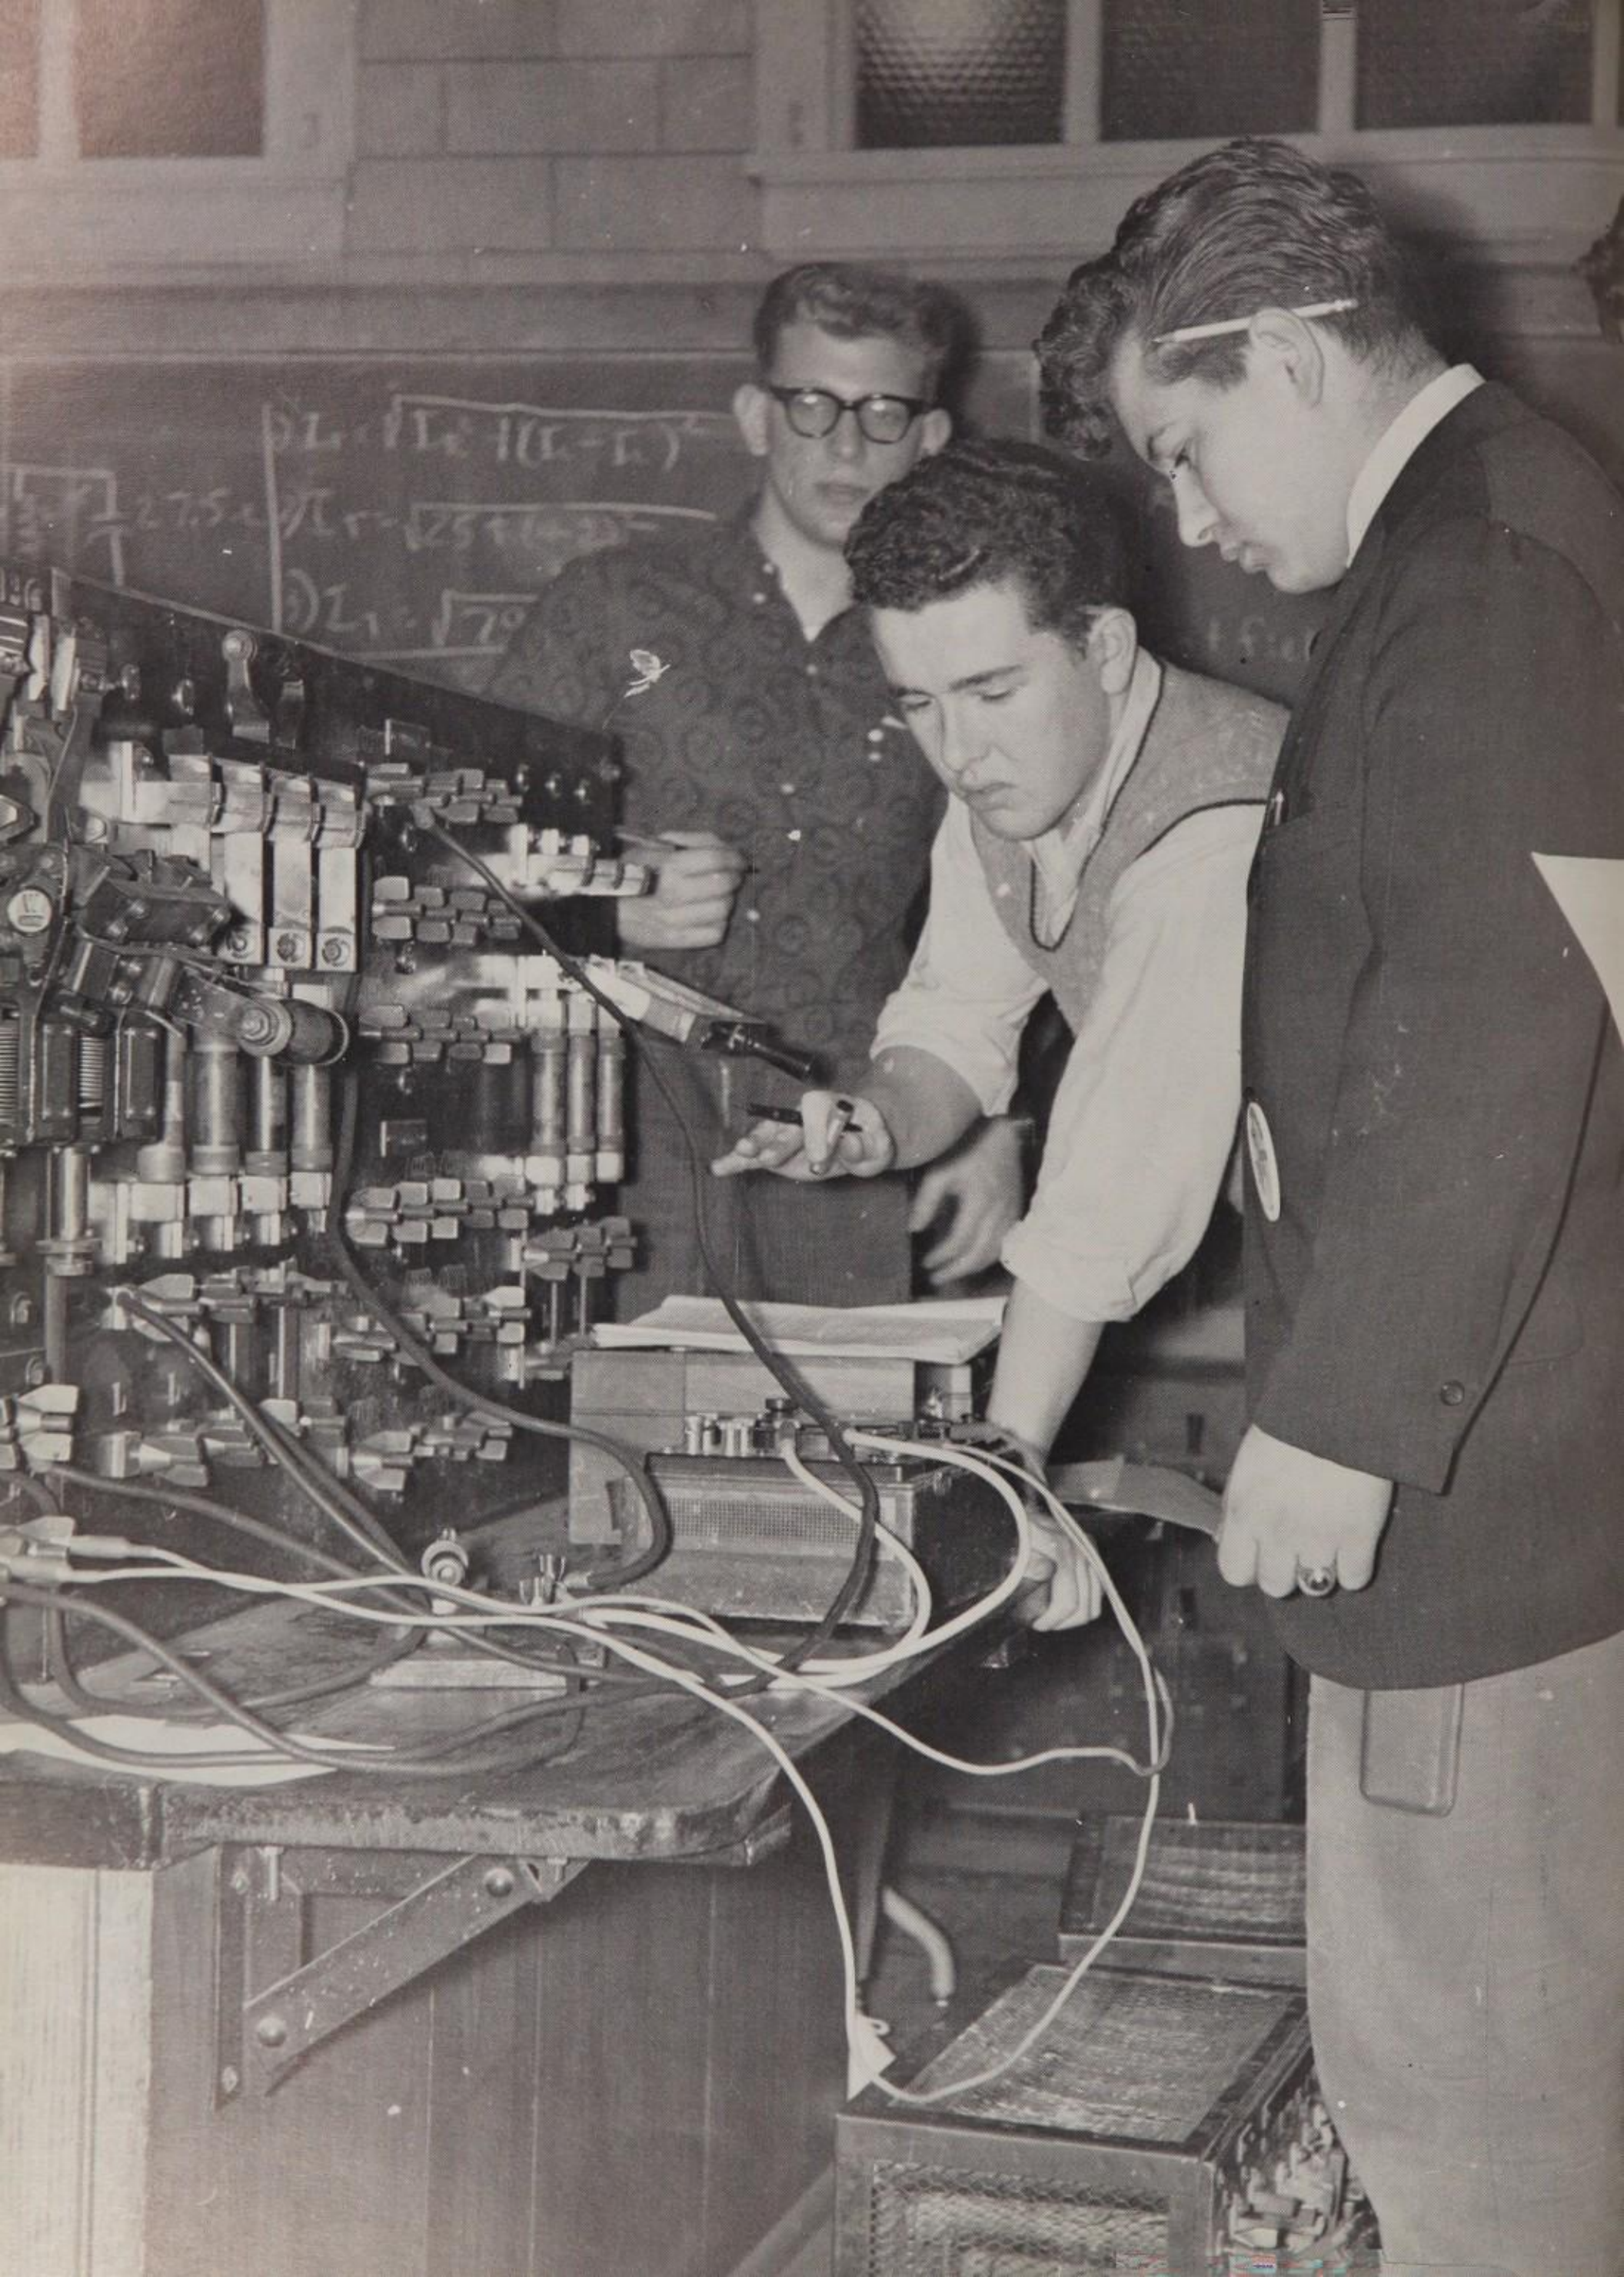
COLLEGE PREP

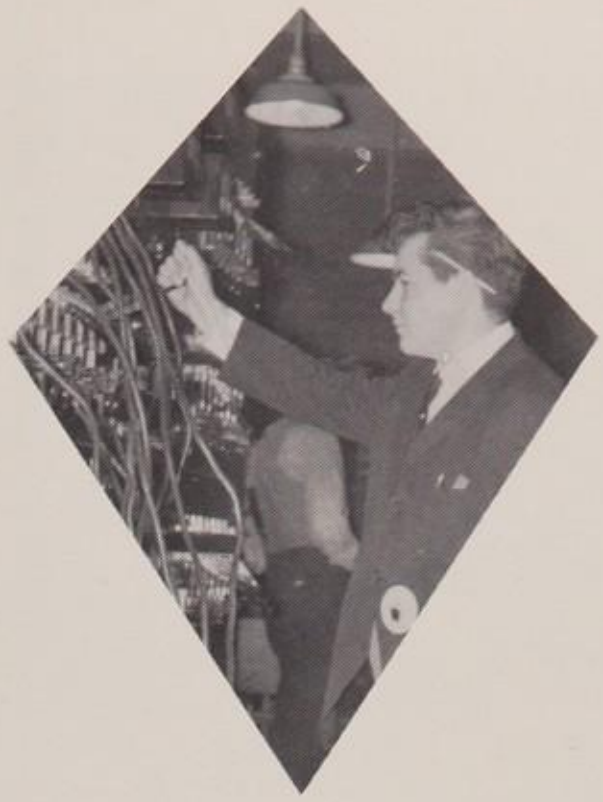
Mike Levenson

Good Luck
Joe Gallo

The Techman who has not decided what field to enter, and who wants a good, well rounded education, takes the College Preparatory Course. Subjects taughts in the course will aid Tech-Knights in college, whatever their field of endeavor is. All are required to take four years of Mathematics, and for a select few an accelerated course is available which enables the bright student to take Calculus and Analytical Geometry in his senior year. Honor and Advance Placement Courses are also given in English, history, and physics.

The latest science books in French and German are made available to the boys in the C.P. Course, who take two or three years of either language. Besides his mathematics and English courses, the College Prep man gets a peek at chemistry, biology, and a variety of shops. After taking machine shop in his third year the C.P. man can choose between advanced machine shop, printing technology, or elementary metallurgy.



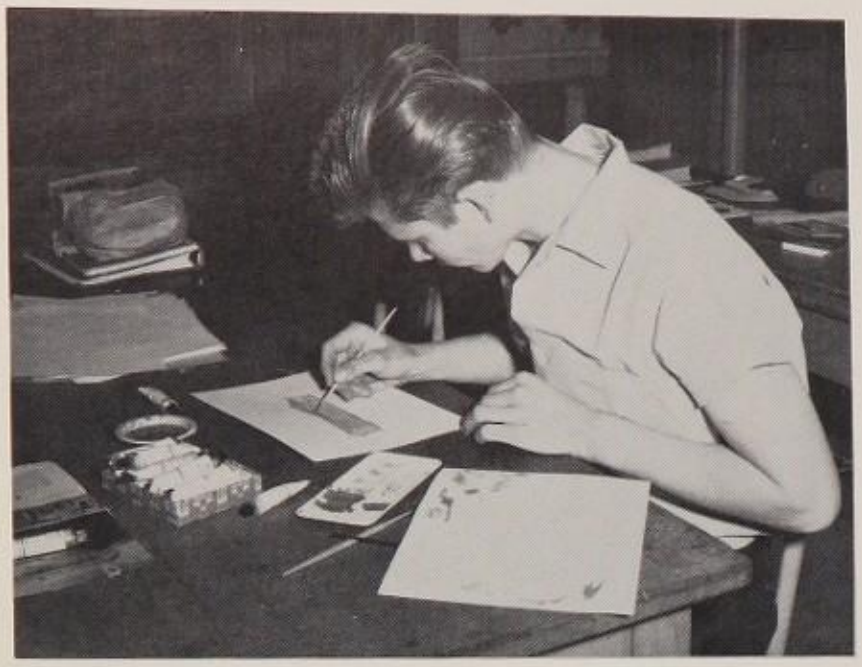


ELECTRICAL

Check that cyclotron! Is your audio-amp on frequency? Watch out for the FWR grid oscillator! Only in the Tech Electrical Course could one hear such frantic words as these. A layman might think all this technical information just gibberish, but underneath all that grand language the Electrical Course is one of Tech's finest.

The primary purpose of this course is to give the students a firm understanding of electrical principles, both theoretical and applied. The many lab periods which are included in the course of study enable the prospective electrical engineer to develop practical ideas. During recitation periods, the scope ranges from Ohm's law to complex characteristics of variable frequency oscillators. In the electrical shops, each student has an opportunity to build an electronic kit of his own choice.

The Broadcast Course boys are qualified for the First-class Radio-telephone operator's license issued by the F.C.C.



INDUSTRIAL DESIGN

The basic I.D. course has remained unchanged since its inception at Tech, but some recent alterations have brought it up to date, and made it a well rounded syllabus.

Industrial Design students, for the first time, take a year of biology, extra math, or a foreign language. Future students of the course will be able to take two, and in some cases, three years of a language.

These revisals in the course of study will enable students to qualify for a greater number of colleges, and in doing so, they will broaden their secondary schooling.

Pens, pencils, and brushes will still be prevalent characterists of the I.D. course, but with greater demands for subject requirements made upon the students by college administrators, industrial design at Tech has made some concessions to other fields of education.

MECHANICAL

Looking back one realizes modern society could not exist without mechanical engineers. Students interested in this career take the Mechanical Course. They learn to manufacture, design, and assemble mechanical equipment.

Subjects included under this course are Strength of Materials, Metallurgy, Power Laboratory, Machine Design, Mechanical Shop, and Advanced Pattern Making. Mechanical Shop is required from the fifth term through the eighth in the Mechanical Course. The first term of Mechanical Shop gives the student a basic knowledge of procedures in the theory and practice of machined parts in production or inspection. The importance of safety, care, and cost, as well as skill in the handling of all parts, gages, and measuring instruments are stressed. A through knowledge of blueprint reading is required to familiarize the student with operations, finishes, and tolerances demanded by industry.

Sufficient skills are taught so that the student can successfully enter into the industrial field and advance to positions of great responsibility.

Best of Luck to a "Muscle Bound" guy! Dan Sullivan

STRUCTURAL

For students interested in Civil Engineering and related fields, Tech offers the Structural Course. This course provides basic training and applications of engineering fundamentals. After graduation, structural men qualify as junior structural draftsmen, fabricating shop assistants, aides to superintendents of steel construction, or laboratory technicians in material testing.

The curriculum of the Structural Course consists of strength of materials, surveying, structural shop, structural design, and graphic statics. The culmination work of the Structural Course is in structural design and graphic statics.

It should be emphasized that in all structural subjects, safety is stressed. No student is permitted to work without the proper safey procedure.

In his senior year, a student of the Structural Course must take a State Comprehensive Regents Examination required for his diploma. Upon graduation, he may attend any college of engineering in order to pursue the Civil Engineering curriculum, or go into industry in fields related to construction or civil engineering.

Fall President

GENERAL

MR. ROBERT SMITH
Faculty Advisor

Every school must have a structure which governs and regulates student activities. In Brooklyn Tech, the General Organization is such a structure incarnate. Last term, the G.O. had a membership of 5500 and a budget of $31,000.

The main body of the G.O. is the Student Council, which is composed of the president, vice-president, and secretary of each grade council, which in turn is composed of the class officers of each prefect. The president and vice-president of the school are also the president and vice president of the Student Council.

BARRY RUDIN
President

Best of luck in all your future endeavors
Barry Rudin

ARTHUR RUDIN
Vice President

STUDENT COURT

G.O. CANTEEN

ORGANIZATION

The Student Court is another important part of the G.O. It is composed of eight judges, and hears the cases of students who feel that they have been wronged. The court has the power to give detention. This term's chief judge is Barry Kamins. He is assisted by Secretary Max Munn. Sergeant-at-Arms Victor Sicuranza maintains an orderly court room.

During our four years in Tech, the G.O. has run many memorable dances and canteens. Many a Technite will remember the night when he and his best girl attended such dances as the "Roof Top Swing" and the "Halloween Twist."

Looking back, one realizes that an organization is only as good as the men running it, and the G.O. has had the finest. Faculty adviser Robert Smith has been helped by last term's president, Franz Hoge, vice-president, Harold Bing, and secretary, Arthur Rudin. This term's officials are Barry Rudin, president, Arthur Rudin, vice-president, and George Stratis, secretary.

SOCIAL COMMITTEE

G.O. ADVISERS

LONGFELLOWS

If a boy stands head and shoulders above the rest of his class, both physically and scholasticly, odds are that he is one of Tech's Longfellows. The Longfellows are an organization for boys over six feet tall, and who have obtained a high scholastic average. Their function is to chaperone dances, PTA meetings, and graduation ceremonies. They also help organizing various sport events such as basketball, football, and the annual Student-Faculty Basketball game. Lastly, our "Tree-toppers" inspect the assembly after every program in search of missing lunches, pens, books, students, etc.

This term as well as last, the group was lead by Joe Olenski. Brian McGovern, Lester Lockspeiser, and Sheldon Bernstein were vice president, secretary, and treasurer respectively. Mr. Jack Feuerstein was once again the faculty adviser to the Longfellows.

Each term the boys have their own social affairs. This term, sophomore, junior and senior Longfellows competed in basketball. Every May they hold a boatride.

At the present time there are 58 Longefellows.

At graduation, the boy who has rendered the most service to the organization receives the McHugh Memorial Award.

ARISTA

ARISTA INDUCTION

Anyone can identify a Tech Arista-crat by the shiny halo which floats loftily over his head and the blue and white oval shapped Arista button which adorns his dress. Arista members have the intelligence of an IBM machine and the school spirit of a football cheerleader. Before a student is admitted to Arista, he must have obtained a total wighted average of 85% and at least 75 service credits.

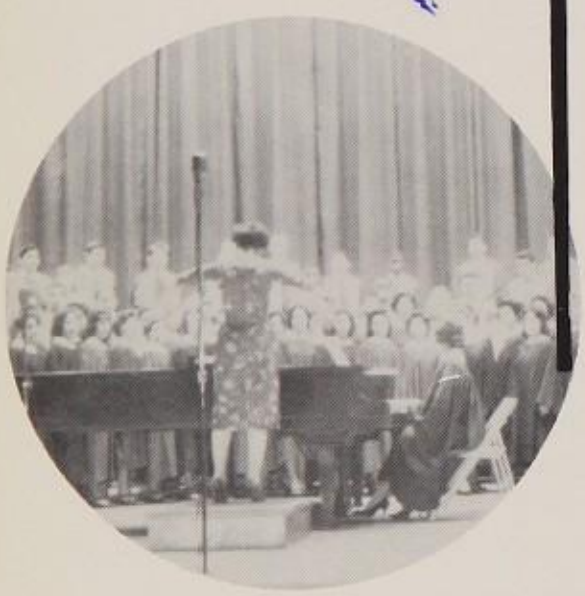
Arista members assist Tech's Entrance Committee by proctoring the entrance examination. They also assist the Program Committee in its complex work. "All work and no play makes Jack a dull boy", so, every term our "wonder boys" hold a dance with Bay Ridge Arista members.

This term Anthony Tromba and George Moran served as leader and vice leader respectively. They were assisted by secreary Marc Lehrer and treasurer Howard Tooter. Mr. Vincent Longobardi again served as faculty adviser for the organization.

MARCHING BAND

Music

ORCHESTRA



GLEE CLUB

MR. GARTER

T.F.

As we look back over our years at Tech, some of our most vivid memories will be those of Music Department's programs.

The Band, under the direction of Mr. Garter, plays at the football rally and at football games. In the spring, the band presents a program of light classics and music for symphonic bands.

The orchestra also under Mr. Garter, brings the music of the old masters to life in its two concerts.

The dance band, under the direction of Mr. Needlman, plays the music of the great swing and modern jazz bands with a feeling and style all its own.

The glee club, under Mr. Troxell, presents two concerts with varying moods. The Christmas concert, performed with the Bay Ridge chorus, expresses both the solemnity and joy of the holiday season. In the spring concert the music is light and gay as befits the season.

In our memories of Tech we will always enjoy reliving the music department presentations.

Kenneth Blake

KENNETH BLAKE, Inspector

When one looks back at his career at Tech he invariably remembers the Service Squad. Some of us remember it pleasantly; others not so pleasantly.

One recalls that second termer who had the audacity to ask a senior for a pass, or that voice always yelling "Hey you, stop that running." And who can forget this famous expression, "Let me see your transportation card," or "Morning or afternoon?"

Even though a few students will doubt it, the service squad has done an excellent job. Besides keeping order in the lunchroom, and the zero-nine periods, the S.O.S. has directed student traffic at all times during the school day, and generally gives the school invaluable services.

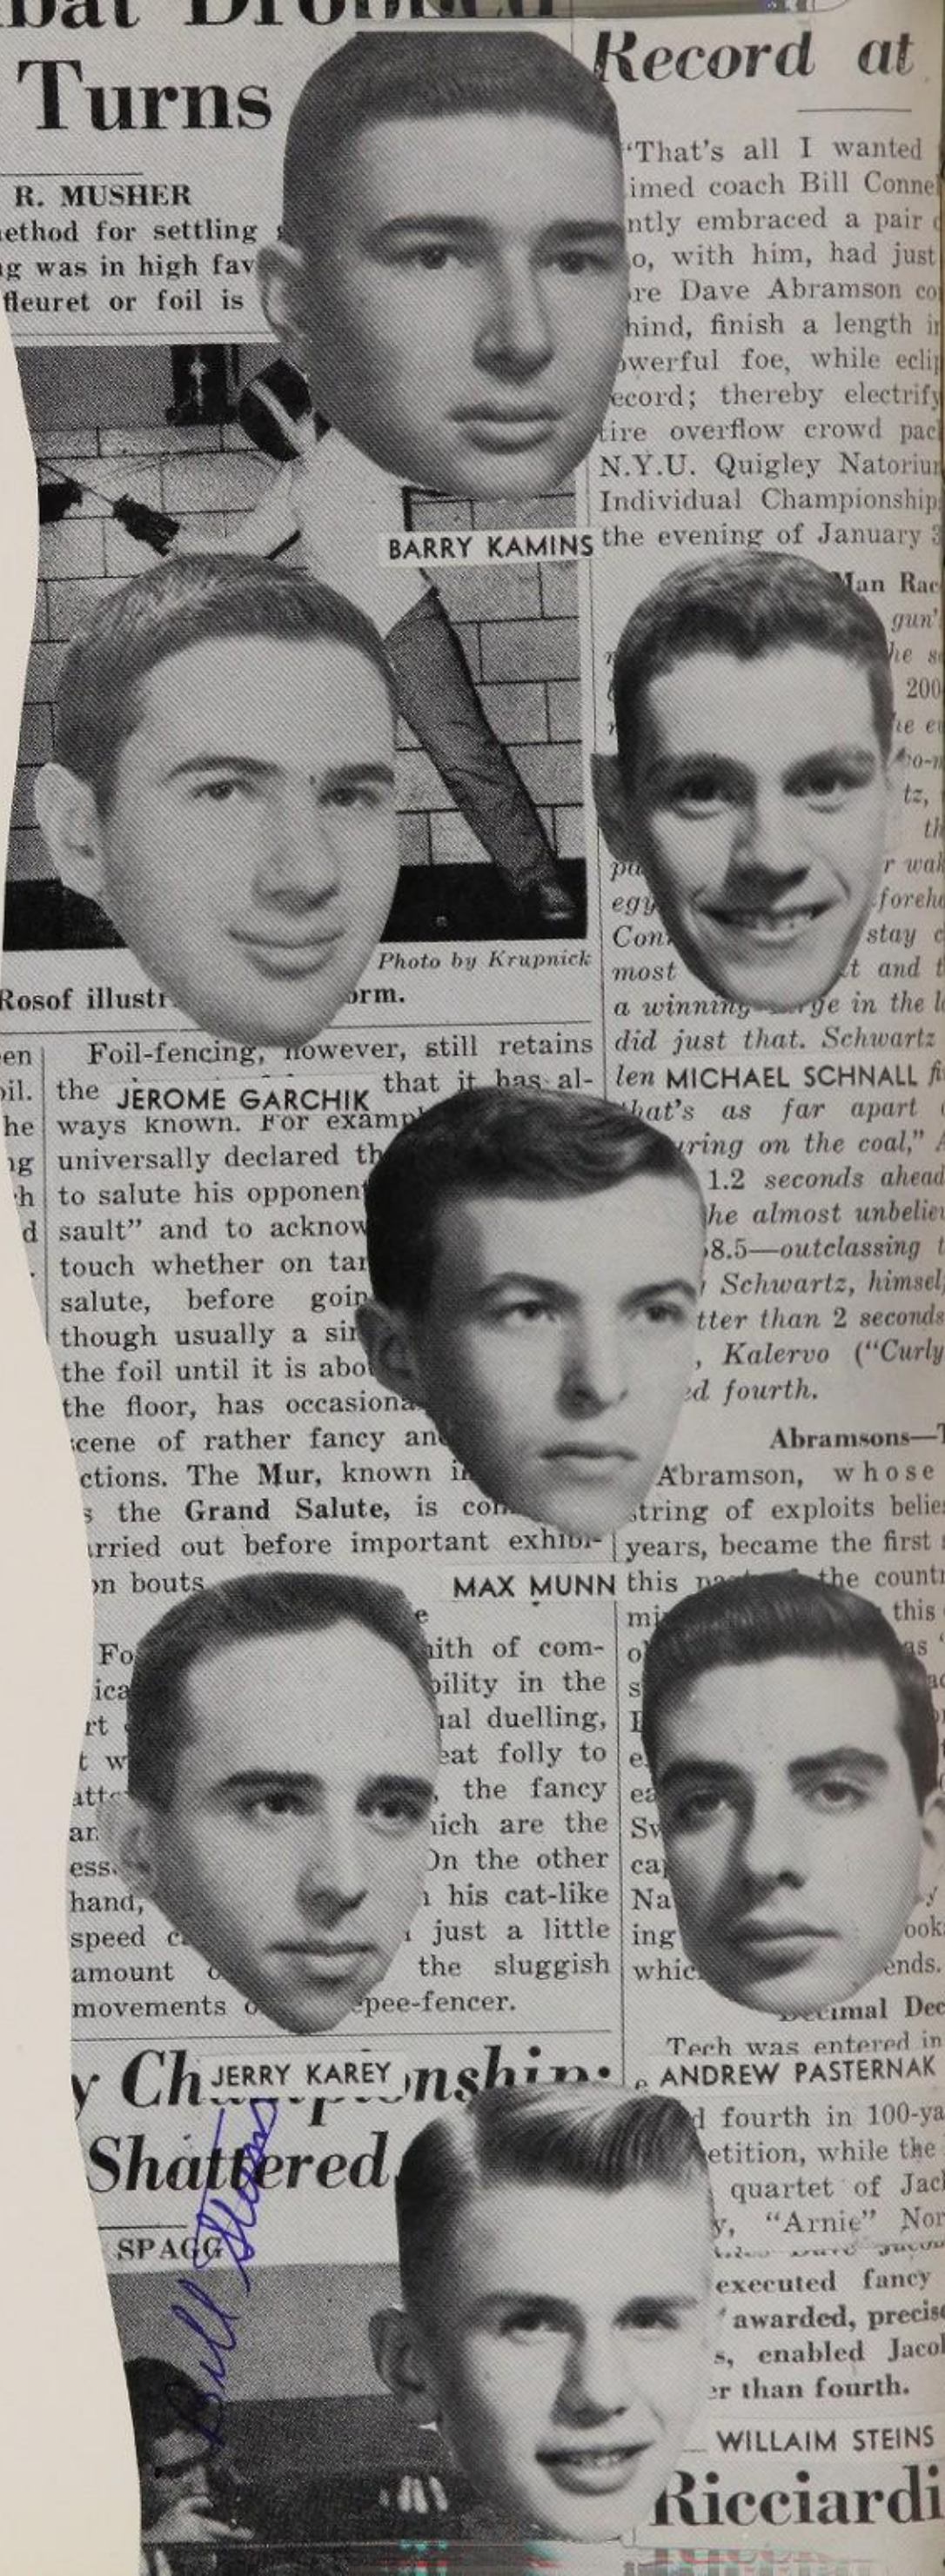
This term's officers have been: Captain Joseph Hammond and Inspectors Arthur Gross and Kenneth Blake.

Under the direction of Dr. Starr and Mr. Durso, we are sure that the squad will continue to live up to its motto "Safety Order Service."

MR. JOSEF BRAND
Faculty Advisor

Survey

The "Survey", hot off the presses, is avidly read by over 5,000 students who willingly subscribe to it every term. Headed by Mr. Josef Brand, faculty advisor, the "Survey" appeals to everyone in some particular way. Page one is devoted entirely to news and the up-to-date happenings in and around Tech. Page two comprises editorials; page three, sports; and page four, the "creative page", is the feature story and poetic page. This year's "Survey" management has given the paper much local value and wide acclaim throughout the city. In charge of the entire paper this year was Barry Kamins, editor-in-chief. He was ably assisted by the editorial board consisting of Michael Schnall and Jerry Garchik. Senior page editors were William Steins, Jerry Karey and Max Munn, with assistants Andrew Pasternak and Joel Dubow completing the list. Much can be said about the "Survey" but perhaps the most impressive thing was once said by a Tech graduate: "The Survey is as much a part of Tech as are the classrooms; take it away and you have a tremendously unfilled gap."

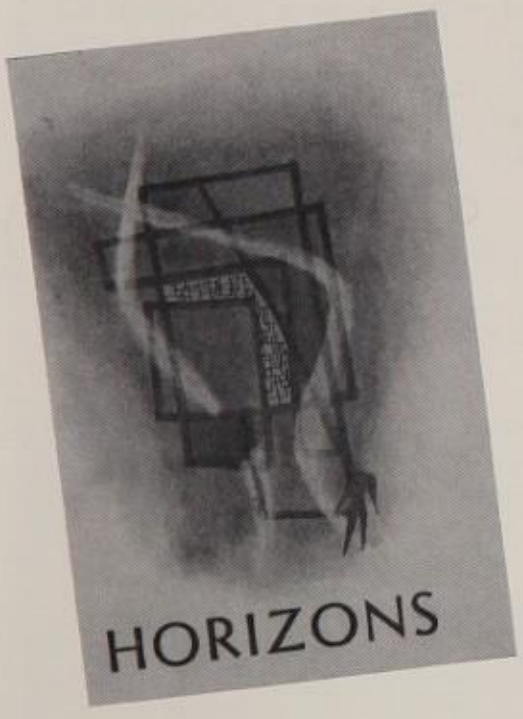


HORIZONS

"Horizons" has long been one of the City's most noteworthy literary publications. This year's issue received commendations from both Mr. William Pabst, principal, and Mr. Daniel Cahill, chairman of the English Department.

Charles Scawthorn assumed the top post of managing editor. The members of his staff are Eric Studenny, literary editor; Eugene Pinnell, poetry editor; Barry Sourile and Ed Kelly, art editors; Ronald Derenberg, exchange editor; Gary Sendroff, coordinator-chief; and Ronald Layman, story editor.

Dr. Goldstone, faculty advisor, has stated that the success of this issue reflects credit not only on this year's staff but on former editor Ron Ruderman and his staff. Ron Ruderman and Jerry Krupnick, Blueprint editor, are acting as technical advisors to this term's issue of "Horizons".



DR. RICHARD GOLDSTONE
Faculty Advisor

Math Student

Before the first second of the new term ticks off minds and hands are busy kneading together Tech's three magazines.

This term, under the guidance of Mr. Rothman, George Moran, editor-in-chief, Ronald Layman, art editor, Anthony Tomba and Steven Langsam, Editors Emeriti, and a staff of fifty will put out the June 1961 "Math Student", which will be celebrating its 30th Anniversary.

The Math Student over the years has won the Columbia Press Association Medalist Award constantly. This year the U.S. Department of Health, Education, and Welfare recommended the magazine to schools all over the nation.

In the last four years it has published approximately one-hundred sixty articles covering the mathematical fields of Algebra, Arithmetics and Geometry. These articles have ranged from deep matematical concepts to mind-teasing problems.

Best Wishes to a Wonderful Term,
Dave Spaeth

One of Tech's outstanding publications, the "Science Bulletin" has repeatedly won many honors. In addition to receiving the Columbia Scholastic Press Award, it is also listed with the U.S. Department of Health, Education, and Welfare as a model for schools wishing to form such a magazine. The bureau states that "A school magazine devoted to technical subjects, besides supplying motivation in subject matter, is a means of promoting activity in technical writing. The Brooklyn Technical High School has such a bulletin which is issued twice a year—the 'Science Bulletin.' " This term's editors are Gordon Lewandowski, Joseph Merenda, Michael Smith, Harold Weinappel, Roger Potash, David Spaeth, Michael Cohen, and Ronald Layman.

They have followed in the fine tradition of their predecessors in doing a wonderful job on the "Bulletin".

Football

Tech had gone four years without winning a City championship. This was not the tradition of past Tech teams. Then, Tech took the P.S.A.L. "official" City Championship in the mud and mire of rain-sodden Downing Stadium by beating DeWitt Clinton, 21-0. This was just reward for the three previous years which were barren of glory for the Tech Gridsters.

It was a bad day for a football game, especially for the Clintonians. The rain, which dampened the spirits, and almost everything else, of the 5,000 students in attendance, started falling during the first quarter and continued for the duration of the game.

Tech's long haul to the title started back in September with a victory over Jefferson. It continued to roll, stopping Lafayette, New Utrecht, Lincoln, Erasmus and Boys to gain a 6-0 P.S.A.L. record. It dropped one non-laegue ball game to Easton Pennsylvania. Now it has compiled the best record since the undefeated 1956 Tech team (7-1).

George Brome led the Engineers in scoring with 70 points. His backfield mates, Steve Strobach, Al Mangiamele, and Rubilotta combined with Brome to form perhaps the best foursome in the city, for an individual team.

Fred Bamford, Joe Pugliese, John Murphy and Greg Berry were standouts all year on the line. Ends Merril Soloman and Phil Norton came into their own in the final games.

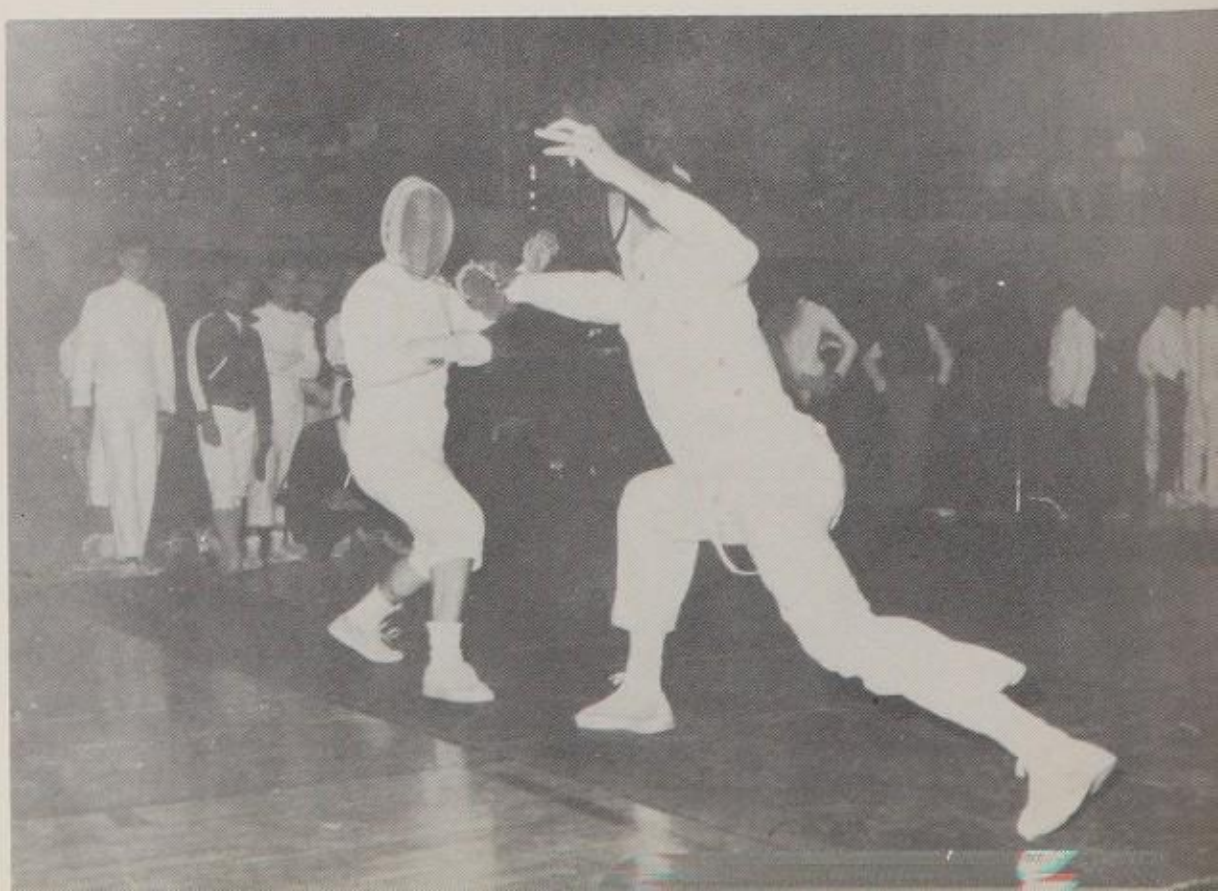
Coach Adam Cirillo, after 21 seasons at Tech, has finally gained the official City Championship with a team that should rank among Tech's best.

Fencing

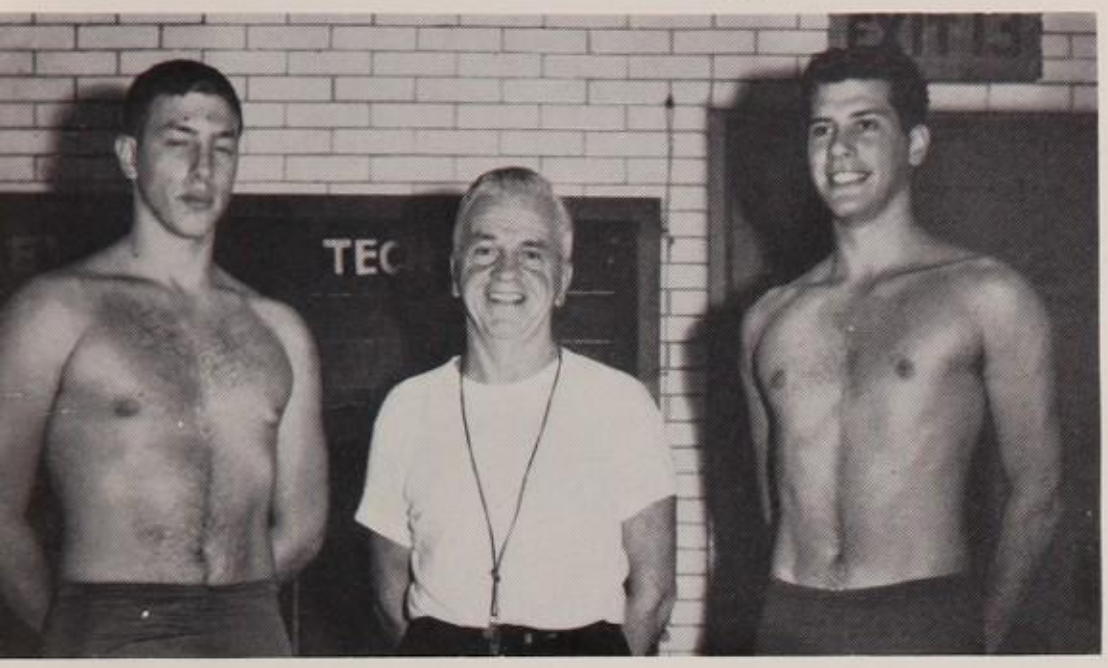
This year's fencing team is being proclaimed as the best in Tech's history. The first five of six starters are seniors. They are Capt. Joseph Nalven, Co-Captain Frank Trombino, Irving Adler, Howard Goodman and Michael Ritter. Among the other seniors on the squad are manager Richard Bienkowski, and alternates Sal Desteffano and Richard Stolar. Mr. Clarvit, one of the best fencing coaches in the city, believes that this year's team will definitely win the P.S.A.L. city championship. Already this season the Fencing Team has won the New York University Invitational Tournament, significant of the Metropolitan championship. This tournament was between thirty-three teams from New York, New Jersey and Connecticut. Tech's winning entry consisted of Joeseph Nalven, Irving Adler and Howard Goodman.

The Fencing team's prospects for the future also look good. This year's squad consists of many fine sophomores and juniors. Mr. Clarvit and the Fencing team are looking forward to many more victories.

Better Luck Next Year
Joseph D. Nalven



Swimming



The Swimming Team has been the most successful of all Brooklyn Tech's athletic teams. They have been undefeated in borough competition for the last 126 meets. This year they have captured the City Championship. In 1957, the Swimming Team also won the City Championship, and in 1959 they took the City P.S.A.L. Individual Championship. The Swimming Team won the Borough Championship all four of our years at Tech.

This year our team is led by Captain and All-American David Abramson, who holds virtually all the major records in the city, and Leroy Emkin, the Co-Capt. A lot of credit for the success of the team belongs to Coach Connell. The seniors of the team are Capt. David Abramson, Co-Captain Leroy Emkin, Dennis Lefevre, James Steehler, Michael Jacobs, William Hillman, William Keegan, Joe Guttenplan, Leon Figuolo, Ronnie Ruderman, Otto Nonnenmann, and Alan Becker.

Baseball

Brooklyn Tech has some of the finest athletic teams in the city and the baseball team is no exception.

Last year, under the able leadership of Mr. Bernard P. Polan, the team captured the Brooklyn Borough Championship by winning twenty-four out of twenty-seven of their games. This is nothing new to the team, for they have captured the same title many times.

This term a team of forty led by such stars as Captains Martin Epstein, George Brome, Mickey Wallach, and seniors Tommy Loland, William Piesel, Andy Rubilotta and Neil Lucey will try to capture the city championship as well as defend their borough championship. This will be no small job, but with such power as displayed by George Brome, who broke a Tech record by hitting four home runs in last term's practice games, all looks well.

I'm there in spirit
Tony W.

Best of Luck
John Foggoli

As we look over our four years in Tech, we can be proud of our handball team's fine record. Under the able coaching of Mr. Dee, the handball team has won the Borough Championship every year and the City Championship in 1959. The alumni feel that 1961 will be another championship year for them. The senior members are Capt. Melvin Minoff, Jeff Fox, Joe Guttenplan, George Pendola, Kenneth Rifkind, Robert Salerno and Teddy Sharpe.

We are sure that the handball teams of the future will sustain the fine mark of the team of June, 1961, and that they will add to the glory of Tech's fine athletic record.

Handball

Golf

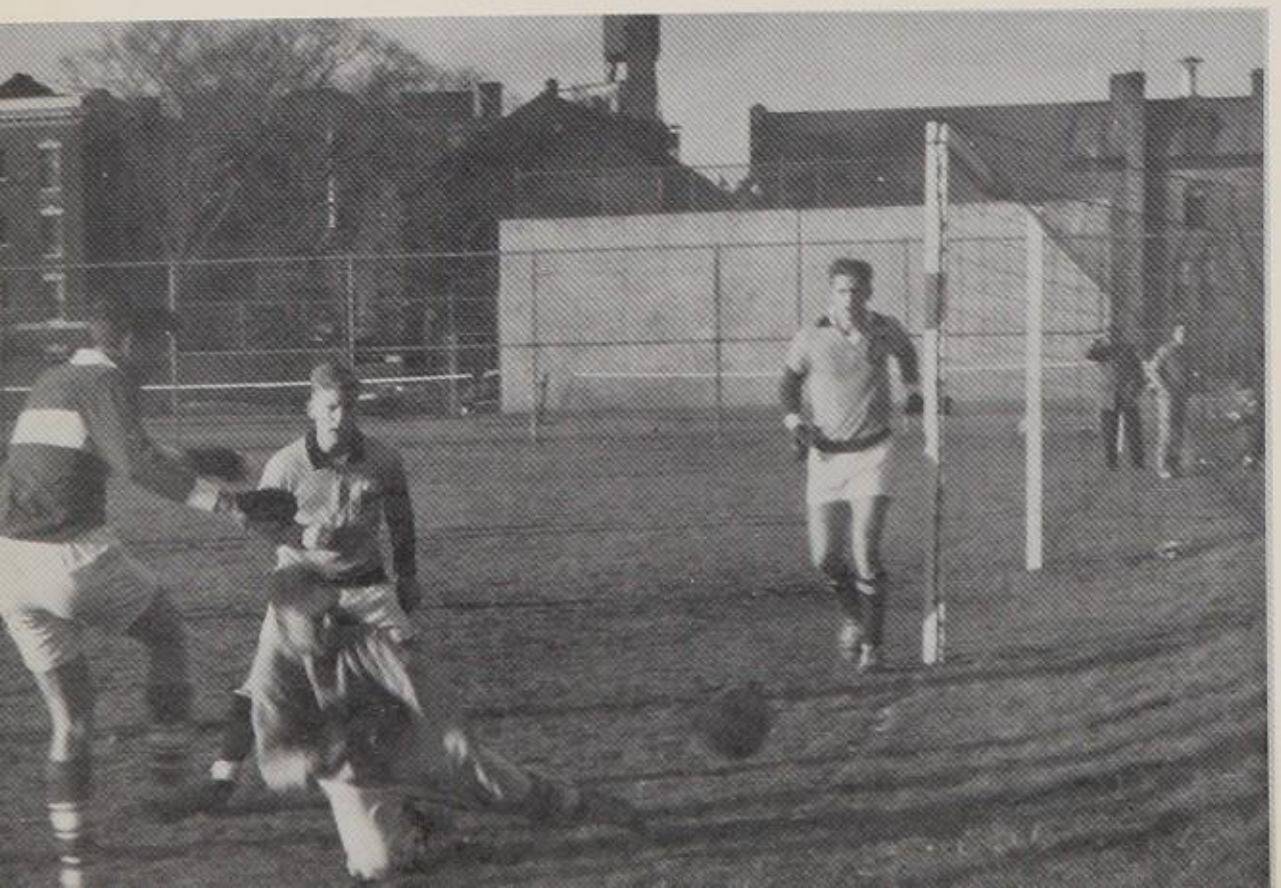
Most Americans forecasted the end of golf when "Ike" left the White House, but the sport lives on, at least at Tech.

Already borough champs in previous years, Tech's golfers are again attempting to gain the title of city champs. Hopes for victory are based on the fine showings by Frank Dimara (Captain), Paul Hoerner, Frank Addeo, and many others. This year's term is again coached by Mr. Balsam, who for years, has coached Technites to victory on the "greens". It will be a long, hard drive to the championship, but this year's team is determined to win.

Soccer

Soccer has become a major sport at Tech, thanks to its success in the last four years. This year's team won fourteen, lost one and tied one. We have also won the Brooklyn Championship. In the last four seasons the team has won sixty-five games, lost five and tied three. The team has amassed 289 goals while giving up only 31. Within this span the team has accumulated the City Championship and four Borough championships.

The greatest asset to this fine record has been the marvelous coaching of Mr. Peck. After every season there has always been a great loss due to graduation. It is never odd to see nine or ten seniors starting every year. This points out all the more the fine job done by Mr. Peck. He always has a well developed Junior Varsity team standing in the wings. This year's graduates include Co-Captains Marty Merrill and Fred Schneider, who both made the all scholastic teams.



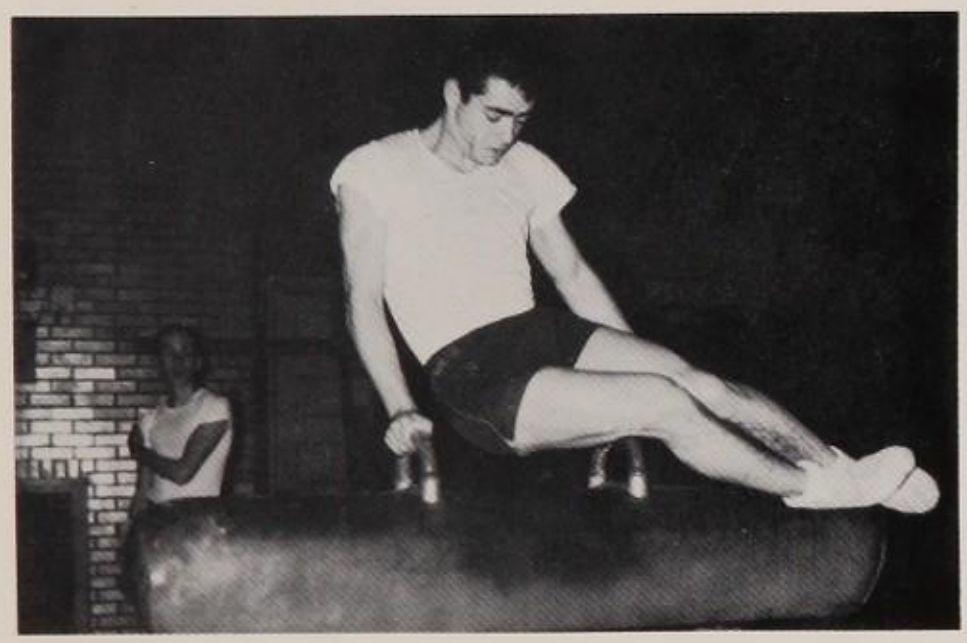
Rifle

Brooklyn Tech has constantly remained on top where rifling is concerned. City and divisional champs in 1957 and 1958, while second in the city in 1959 and 1960, this year marks the Rifle Team's tenth consecutive year as a P.S.A.L. City Championship participant.

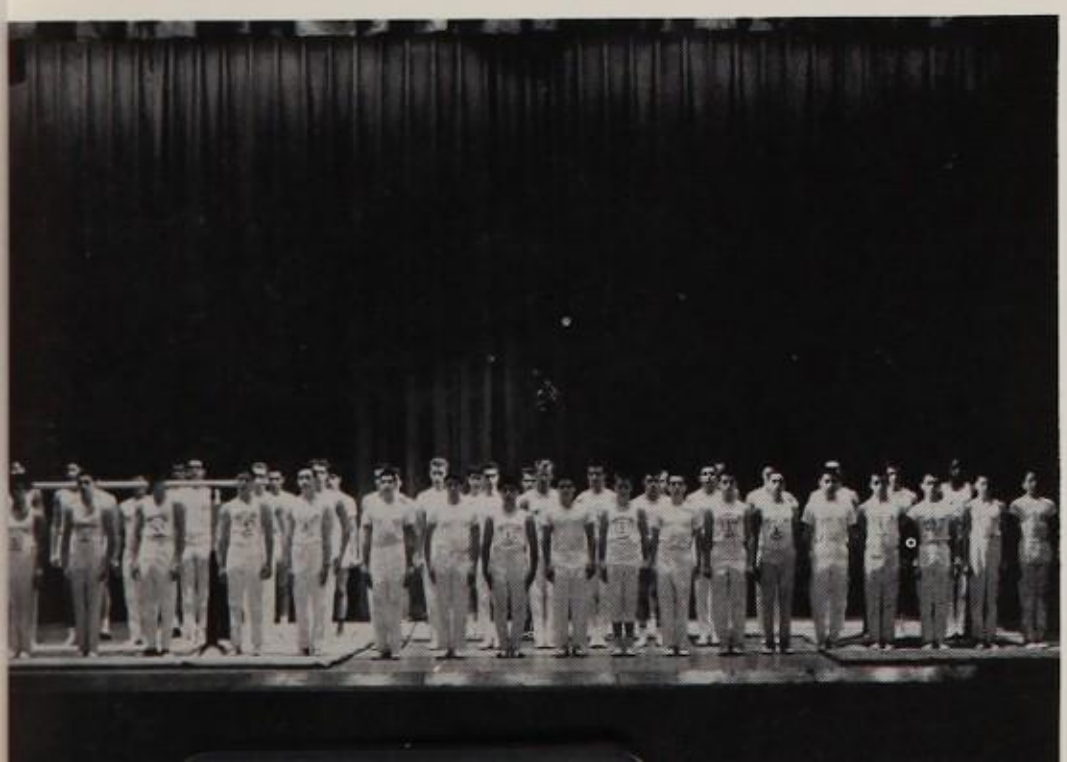
The current riflemen were not consistently stable throughout the season. However, despite score fluctuations, the Nimrods were still able to obtain divisional second place, beating the accurate rifles of Lincoln and Ft. Hamilton, but not denting the armor of formidable Midwood. Second place means a guaranteed City Championship berth.

Captain Ronald Anderson and Manager-Co-Captain Andy Pasternak guided seniors Gabe Palmer, Arthur Gautesen, Phil Szeszko and a covey of talented lower termers through this year's expanded and toughened competition. After the city's, the team will participate in the N.R.A. National Meets.

You could have made
Best Luck Wishes
Phil



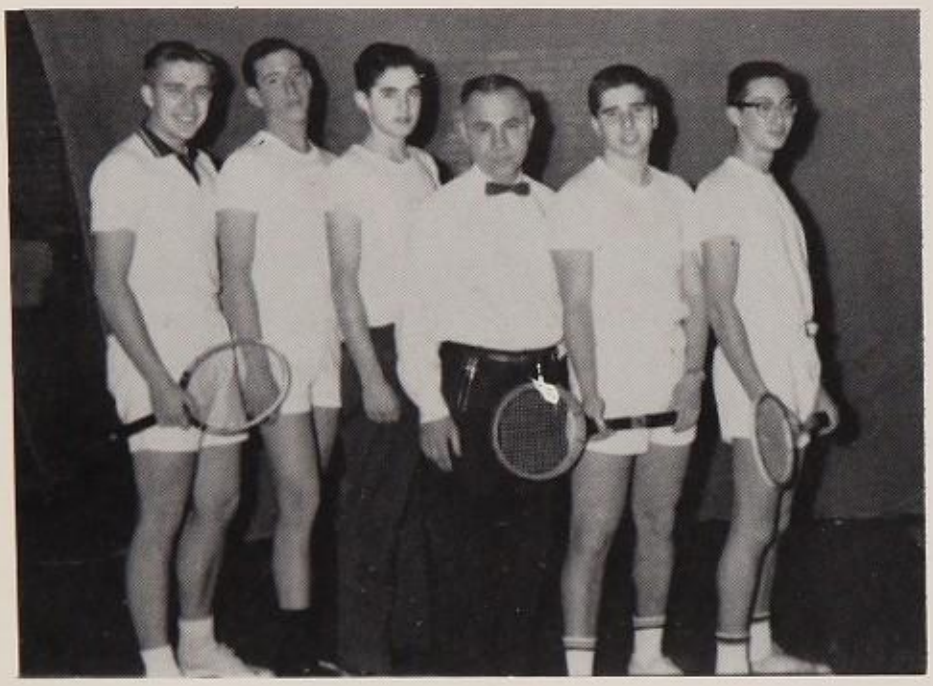
Gym



One of Tech's most consistently winning teams is the gymnastics team. The combination of the coaching of Mr. Christopher Prestipino, and some of the city's best athletes, has turned out a team that has seen few defeats. The gym team has won many honors, but perhaps the most coveted award is the All City Midwood Gymnastics Competition. This season the team has taken first honors for the fourth consecutive year, a feat unmatched by any other school. As a result of this we now have permanent possession of the Midwood Award.

This year's graduating gymnasts are: Co-Captains Ken East and Ron Katen; Richard Beckman, Matt Belmonte, Henry Campbell, Joe Guttenplan, Dan Levy, Tom LoMacchio, John Miller, John Shubert and Richard Sherwin.

Tennis



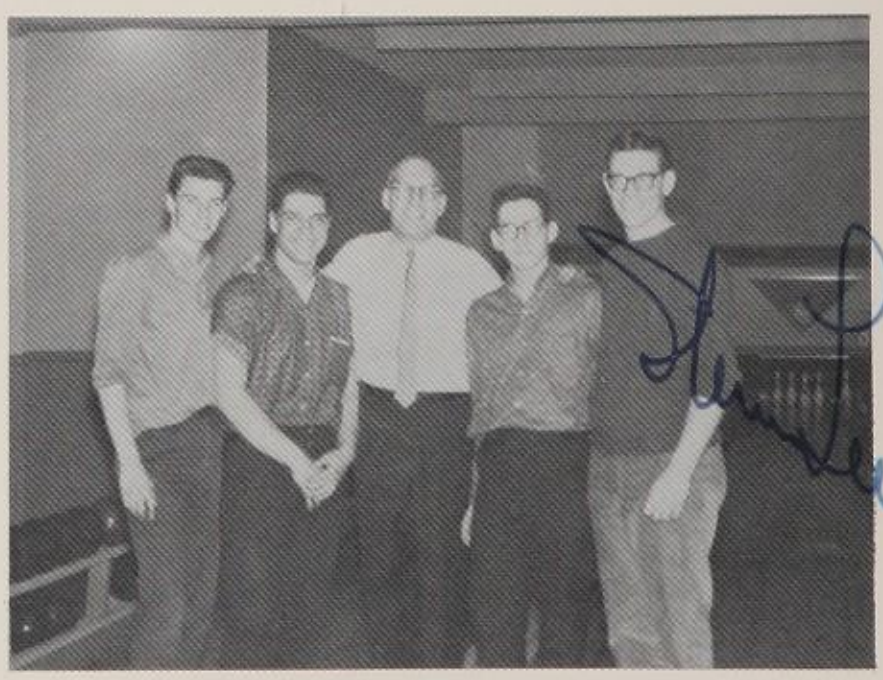
This year, for the first time, the P.S.A.L. Tennis season was held in the Fall Term instead of the Spring Term. Because of the netmen's early practicing we had a fairly successful season. Coach Onorato, who has consistently turned out top teams, said, "This years' team is one of Tech's best." The racquetmen had to settle for third place, because Wingate and Midwood, the usual Tech nemises, came up with even stronger teams. However, our losing matches were very close. The senior members are Capt. Eugene Weiss, Joel Turtel, Warren Shrensker, Mike Copland, and Steve Beyer. Now, in Fort Greene Park, you can see next year's team getting ready to make their bid for the next city championship. Under the exceptional coaching of Mr. Onorato we should come up with an excellent team.

Bowling

Strike! Tech's keglers, under the expert guidance of Mr. Lefkowitz, and leadership of Co-Captains Peter Sorci and James Lopez, have had a fine year. In the ten years that there has been P.S.A.L. Bowling Competition, Tech has won the Borough Championship seven times, while taking the City Championship once.

This year's team, which compiled a very impressive record of 9-1, is composed of seniors Tony Liberato, Richard Matarangelo, Robert Pietras, Lary Schoenburg, Steve Lewit and Steve Langsam. For the third straight year the term has won in their division. Robert Fox, a junior, placed first in the City Individual City Championships. In the Borough Individual Championship Peter Sorci placed first, and Robert Fox took fifth place.

Although most of the team is graduating, Coach Lefkowitz predicts big things for the teams of the future.



Track

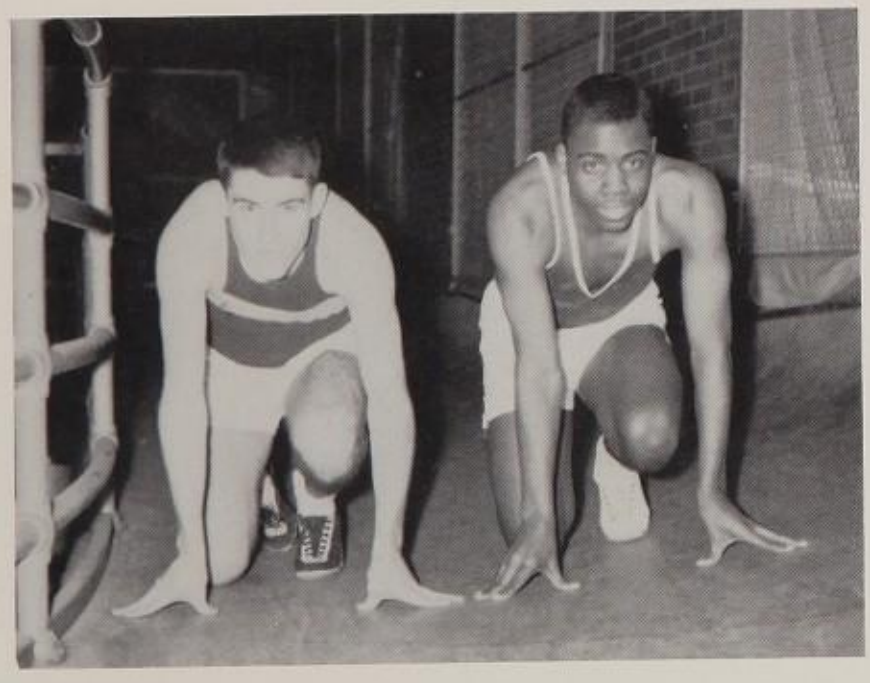
Track events play an important role in an age when physical education is stressed.

High jumping, fifty and hundred yard dashes, eight hundred meter run and the shotput are the main events in high school track.

John Kautz, the only senior and open runner (who has won a track medal) is the captain. Other distinguished trackmen are: Fred Gahie, Ed Jackson, George Wiseman and Joel Prussin. All are novices. (A novice is one who has not won a track medal); however, each hopes to break the jinx in the near future.

The team has not fared too well in the past, but Mr. Weis, the coach, promises, "We're trying."

Cross Country



Every afternoon, in sweat attire or shorts, over hill and dale, goes Tech's Cross Country Team. Since Tech does not have an outdoor track, the team has to use Fort Greene Park. Despite the great handicap of not having an outdoor track the Cross Country Team has made an excellent showing for the past four years. The senior elite members are John Kautz and Peter Hetzel. Under the fine coaching of Mr. Weis we are sure that the Cross Country Team will continue its fine record.

BAY RIDGE BOOSTERS

Basketball

If one looks back at the Engineers' record of nine wins and five losses in league play for the 1960-1961 season, he can not readily see the change that has occurred in team tactics from the previous year. However, this year's basketball team, coached by Mr. Henry Goldman, has been one of Tech's most well-coordinated teams. Lacking in height and experience, the team has realized that expert ball handling and deliberation compensate for these wants.

Although not winning enough games to entitle the team to a playoff berth in the Madison Square Garden Playoffs, our "Big Five," Harold Bing, Les Lockspeiser, Paul Schultz, Eric Stiefeling, and Edward Taylor, proved to be more successful than the critics of Tech had anticipated. The team was nobly managed by John Oppenheimer.

Next year, Tech should earn itself a place in the Garden Playoffs. With a fine junior varsity we should beat the usual Tech nemeses—Boys and Jefferson.

Fellow Graduates:

Because we have reached the climax of our days at Tech, to unveil our emotions and to express both joy and sorrow are our only thoughts. Tech has guided us along the path of truth, earnestness, courage and honesty. We know that we owe so much to all of those who have made our stay at Tech memorable.

Matriculating at Tech, we were as blind men waiting to be led. The faculty then took us with a personal interest and led us toward the better things in life. What they really have given us is not a transient knowledge of a subject, but a broad sense of values that will last the remaining days of our lives. We have been enlightened to the great satisfaction there is in achievement and scholarships after very hard work. And hard work it was that we did here at Tech. We are really very gratified that the faculty here takes such a personal interest in its students. Without this interest, many of us would not be part of the graduating class of June 1961. They have instilled in us the goals in life for which we must strive. I am sure that we will never lose sight of our goals.

Because of the training we have received from the faculty and the student fellowship we have found here at Tech, we have already become nostalgic and deeply touched. We are overjoyed about our advancing to college and industry. Wherever we may go, the training received at Brooklyn Tech will go with us. Hoping that we may meet some of our associates again in life, we will always feel the strong tie which prevails among Technites. Whatever we know, whatever we have learned, and whatever we may learn has been made possible to a large extent by our high school education.

We, the graduating class of June 1961, bid Tech a warm farewell. We know Tech will continue to be a "molder of men." We proudly rise to salute Brooklyn Technical High School.

Cordially yours,

Luck in dodging the draft
Larry

A SENIOR IN THE

O wad some power the giftie gie us
To see ourselves as others see us!

When the senior gazes into the mirror, altogether smitten with the object of his affections who stares right back, he beholds a paragon of intelligence and good looks. Unless the gazer is a Tech senior, the effect is illusory. This concisely disposes of the senior's conception of himself; it is our purpose here to show how he may appear to others.

For the first person to look at the senior, let's ask the one who sees him the most. No, not his girlfriend, but his mother. In her eyes the senior can do no wrong. He wears a tie to school every day and toils assiduously at his homework. As he is, she conceives, rather delicate; she is naturally concerned about his health. His face glistens after his brand new shave, and his hair is neatly combed. He smells sweet.

The Inquiring Photographer now accosts the person who sees the senior next most often. No, not his girlfriend, but his teacher. The focus has shifted somewhat, it appears; for in the eyes of his Best Friend and Severest Critic the senior is no longer infallible. More often he is boisterous and frazzled. Blue around the jowls and looking as though he had just lumbered in from a coal mine, our hero, alas, no longer smells sweet.

Let us now pass on to the observer who dreads

. . . his girlfriend

. . . his mother

. . . his teacher

EYES OF:

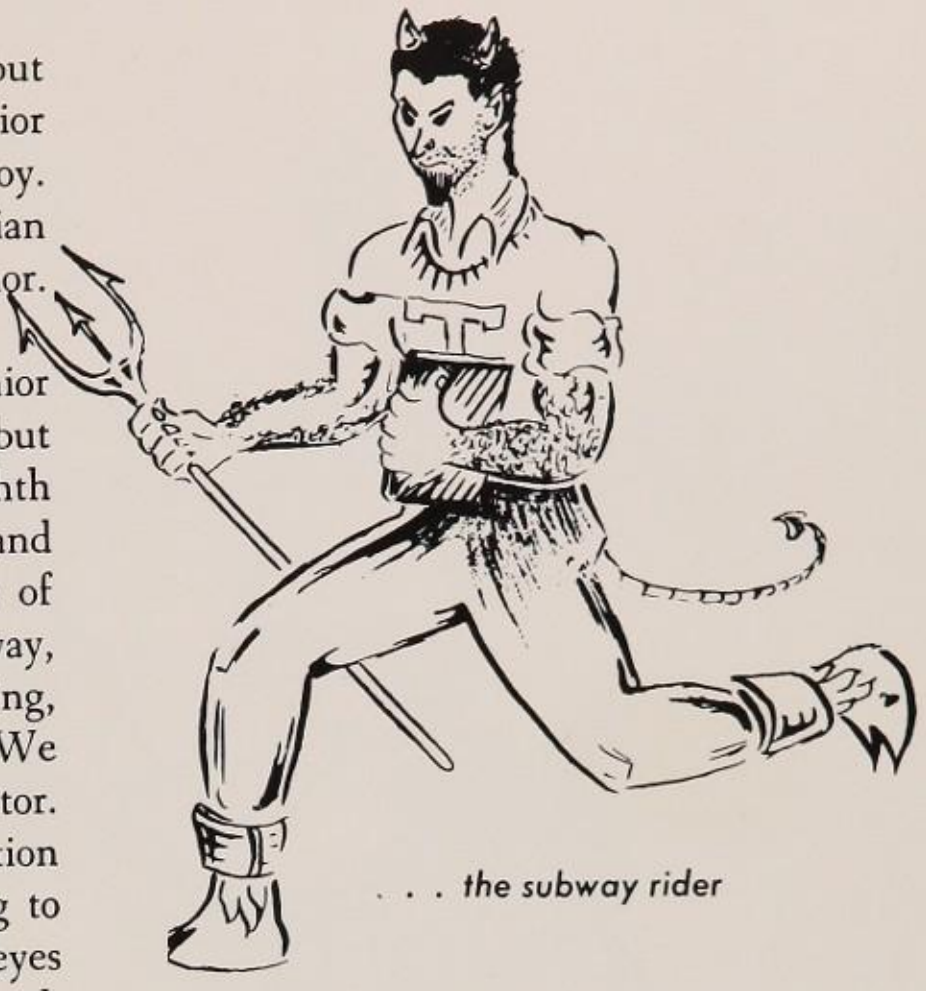
the senior most of all. No, not the freshman, but the subway rider. In his eyes, compared to the senior Frankenstein's monster was Little Lord Fauntleroy. Our hero is now seen as a yawping, pushing barbarian with the savage's usual primitive sense of humor. A strong odor of brimstone now surrounds him.

The next person we meet is the one the senior "likes" best of all. No, still not his girlfriend, but the freshman. In the eyes of the neophyte, Mr. Eighth Termer is a wicked-eyed sadist, always ready and usually eager to inflict pain on the lower orders of animal life. During his first two weeks or so anyway, freshie sees us as something hulking and menacing, like monstrous survivals from the Stone Age. We smell like something too long out of the refrigerator.

It is now the pleasure of this reporter to question the person whose opinion you have been waiting to hear. Yes, his girlfriend. In her big, beautiful eyes Mr. Diploma Seeker is too good for Sunset Boulevard. He is handsome; and if indeed he is indubitably ugly, then he is ugly in a handsome way. His pants, at any rate, are pegged "just right." Always kind and considerate, he acts as though he has just finished having tea with Miss Emily Post. And best of all, he exudes that he-man Mennen odor.

Well, Mr. Tech, take your pick. How do you want to look?

C. T.



. . . *the subway rider*

. . . *himself*

. . . *the freshmen*

For weeks the Tech football team had one idea in mind—to b... Pennsylvania, the best team on the East coast with a 23-1-1 re... years. Tech coach, Adam Cirillo, had the team drilling c... first night game many of the boys had ever played, but f... day, Tech's ... nightmare.

The tr... ...e team ... ...ould co...

...e bus left ... the players ... went past the ... Jersey. At 2:30 ... at Easton, a little ...ery hopeful.

...d of 40 boys filed into the ...dotel, where they were as... ... rooms. The accommodations ...e more than comfortable, since each room contained a television, radio, telephone, and calling bell. After settling down, most of the boys watched the ruggedly fought, televised Michigan State-Ohio State football game, which reminded them of the job to be done that night.

At 4:30 the hungry gridsters went to the dining room for the pre-game dinner. The meal consisted of steak, potatoes, toast, and tea. After dinner the determined gridsters went up to their rooms, but before they could get there, the elevator stuck between floors.

Following rescue and an hour's rest, the team ...
